Tables, Graphs & Constant Change

Find the slope of a table with x-values 0,2,4,6 and y-values 6,12,18,24. Explain each change.

Tables, Graphs & Constant Change

A line passes through (0,6), (2,10), and (4,14). Find its slope and starting value.

Tables, Graphs & Constant Change

The table (0,8), (1,5), (2,2), (3,-1) is linear. Find slope and write the rule.

Tables, Graphs & Constant Change

Compare: Pattern A adds 2 to the output for each +1 input. Pattern B adds 4. Which graph is steeper? Explain.

ALGEBRA 1 | PROJECTABLE QUESTION

Q5 | DAY 2

Tables, Graphs & Constant Change

Spiral: Is {(1,2),(1,2),(3,5)} a function? State the domain and range.
