Tables, Graphs & Constant Change

ROUND 1 OF 3 Questions 1–4

Work independently, then compare your reasoning with your group.

Question 1 **R&P**

Find the slope of a table with x-values 0,2,4,6 and y-values 6,12,18,24. Explain each change.

Question 2 **R&P**

A line passes through (0,6), (2,10), and (4,14). Find its slope and starting value.

Question 3 **R&P**

The table (0,8), (1,5), (2,2), (3,-1) is linear. Find slope and write the rule.

Question 4 **R&P**

Compare: Pattern A adds 2 to the output for each +1 input. Pattern B adds 4. Which graph is steeper? Explain.

Tables, Graphs & Constant Change

ROUND 2 OF 3 Questions 5–8

Work independently, then compare your reasoning with your group.

Question 5 **R&P**

Spiral: Is {(1,2),(1,2),(3,5)} a function? State the domain and range.

Question 6 **R&P**

Preview: A runner gains 18 meters in 3 seconds. What is the average rate of change, including units?

Question 7 **Matching practice**

The table has x-values 0, 3, 6, 9 and y-values 1, 7, 13, 19. Find the slope and identify Δx and Δy.

Question 8 **Matching practice**

A line passes through (0,-2), (3,4), (6,10). Find its slope and starting value.

Tables, Graphs & Constant Change

ROUND 3 OF 3 Questions 9–12

Work independently, then compare your reasoning with your group.

Question 9 **Matching practice**

The table (0,7), (1,5), (2,3), (3,1) is linear. Find the slope and write its equation.

Question 10 **Matching practice**

Pattern A changes by -2 for each +1 input. Pattern B changes by -5. Which line is steeper? Explain.

Question 11 **Matching practice**

Is {(0,4), (2,6), (0,4)} a function? Give its domain and range.

Question 12 **Matching practice**

A cyclist travels 24 meters in 4 seconds at constant speed. Find the rate with units.
