

Quick Check 1.1

Multiple Representations of Relationships · Algebra 1 · Unit 1

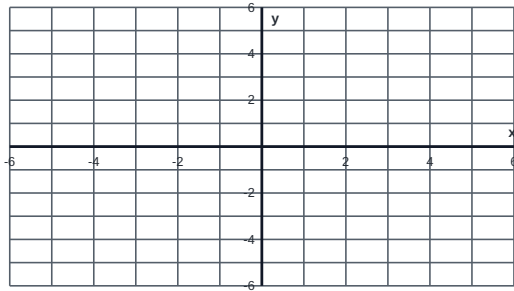

VERSION A

Show enough work to make your thinking clear.

1. Plot a given ordered pair.

U1-MG01-IC01 Plot and read ordered pairs.

Plot point P(-5,4) on the coordinate plane and label the point.

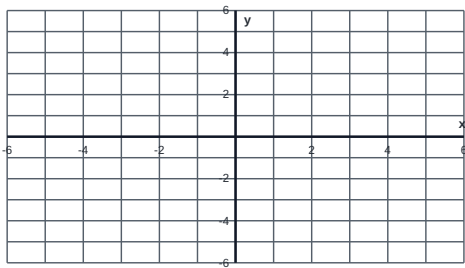

2. Use x first, then y.

U1-MG01-IC02 Use the x- and y-axes correctly.

For Q(3,-5), state which axis controls each move. Then plot Q.

First coordinate: _____ axis, move _____

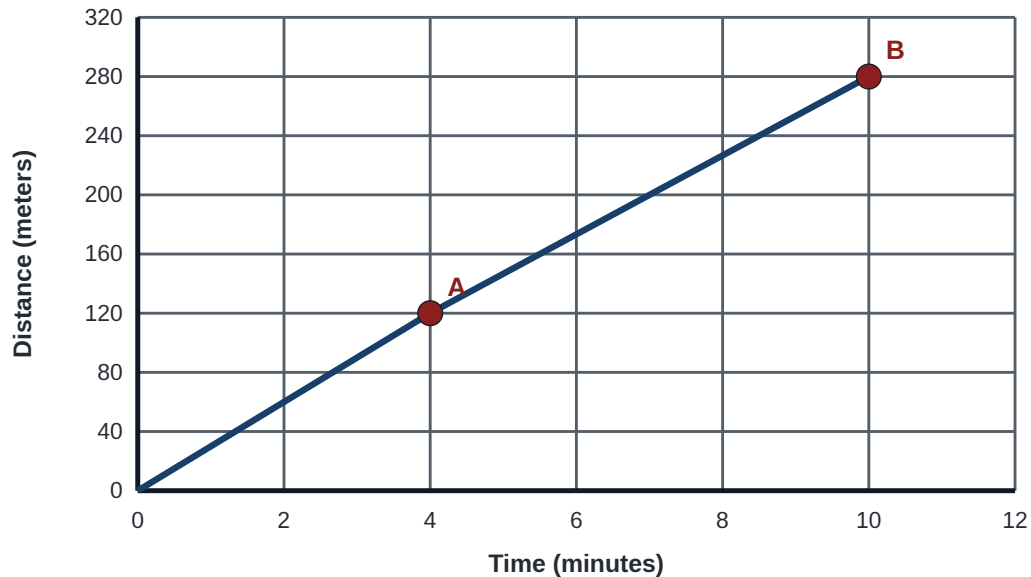

Second coordinate: _____ axis, move _____

3. Read two values and compare.

U1-MG01-IC03 Read a graph using its scale.

Use the graph. How much farther is the distance at $t=10$ minutes than at $t=4$ minutes?

At 4 min: _____ m

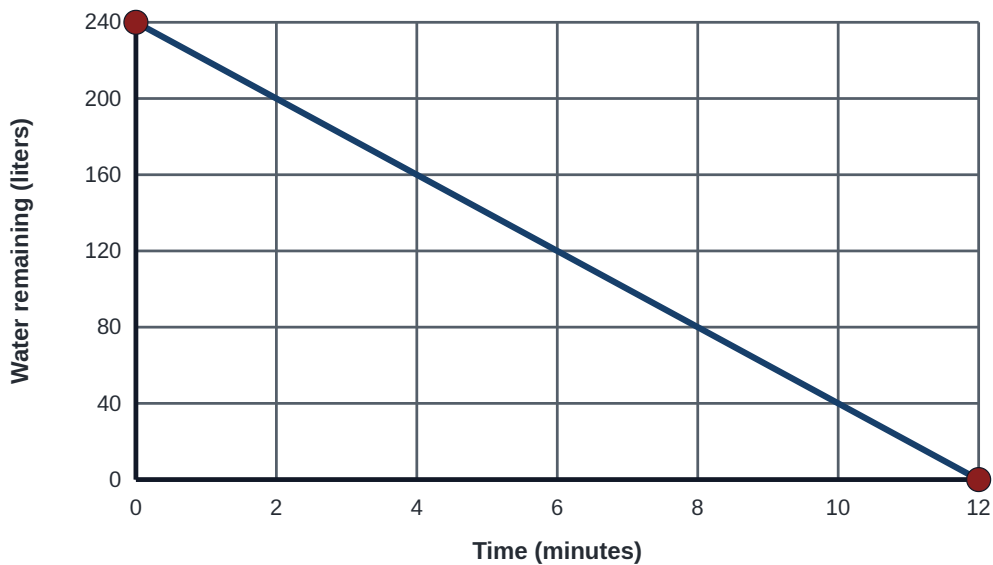

At 10 min: _____ m

Difference: _____ m

4. Interpret intercepts in context.

U1-MG01-IC04 Identify and interpret intercepts when they are shown.

The graph shows water remaining in a tank over time. Interpret both intercepts in context. Include units.

y-intercept: What does it mean? _____

x-intercept: What does it mean? _____

Quick Check 1.1

Multiple Representations of Relationships · Algebra 1 · Unit 1

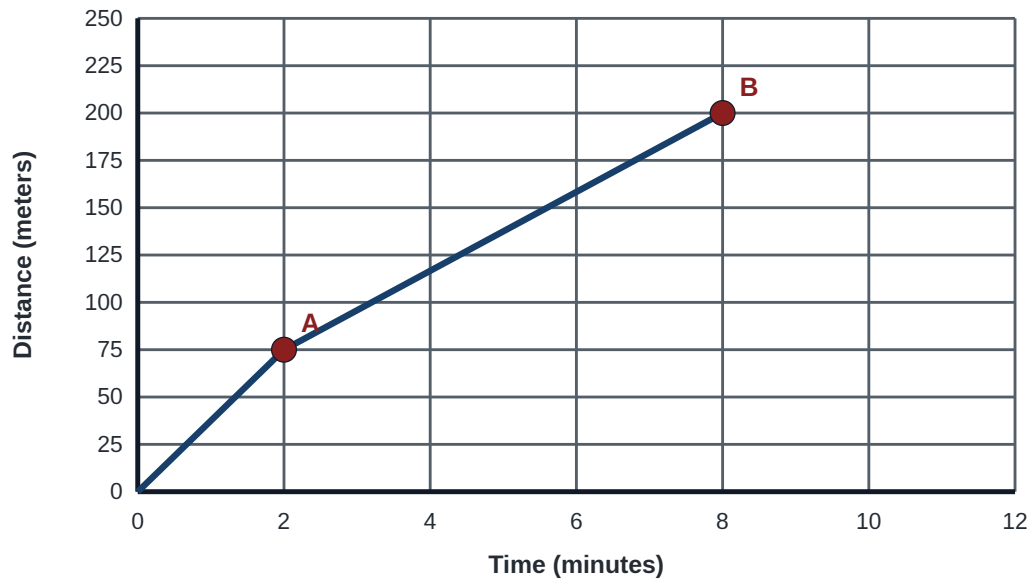

VERSION B

Show enough work to make your thinking clear.

1. Read two values and compare.

U1-MG01-IC03 Read a graph using its scale.

Use the graph. How much farther is the distance at $t=8$ minutes than at $t=2$ minutes?

At 2 min: _____ m

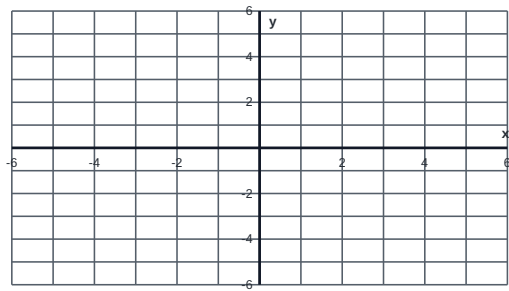

At 8 min: _____ m

Difference: _____ m

2. Plot a given ordered pair.

U1-MG01-IC01 Plot and read ordered pairs.

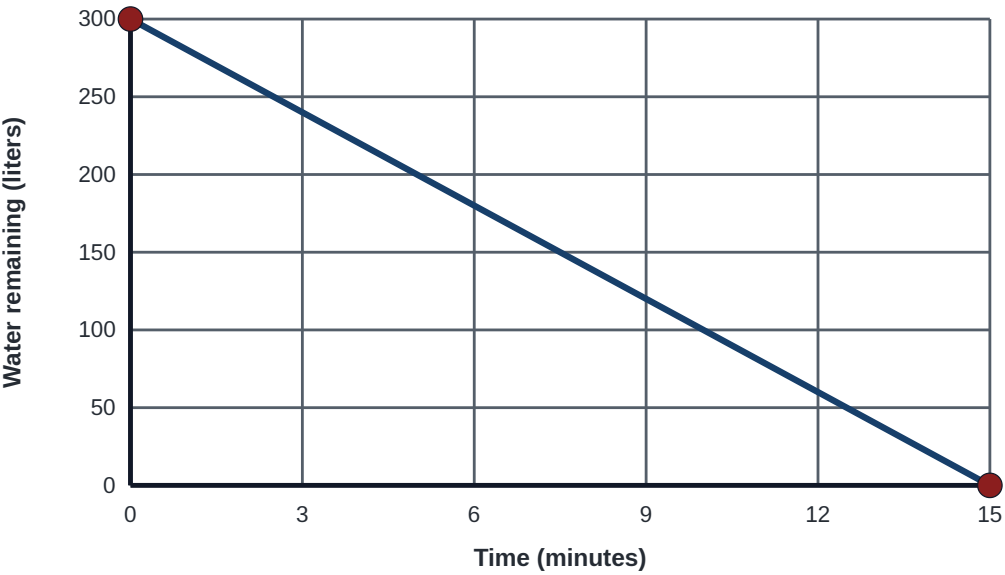

Plot point $P(4,-3)$ on the coordinate plane and label the point.

3. Interpret intercepts in context.

U1-MG01-IC04 Identify and interpret intercepts when they are shown.

The graph shows water remaining in a tank over time. Interpret both intercepts in context. Include units.

y-intercept: What does it mean? _____

x-intercept: What does it mean? _____

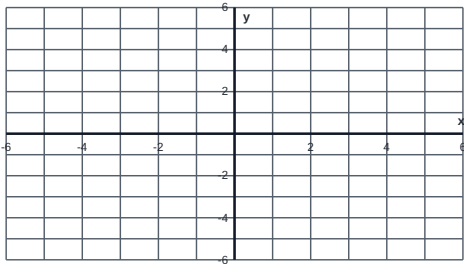

4. Use x first, then y.

U1-MG01-IC02 Use the x- and y-axes correctly.

For $Q(-4,2)$, state which axis controls each move. Then plot Q.

First coordinate: _____ axis, move _____

Second coordinate: _____ axis, move _____

Multiple Representations of Relationships · Algebra 1 · Unit 1

VERSION C

Show enough work to make your thinking clear.

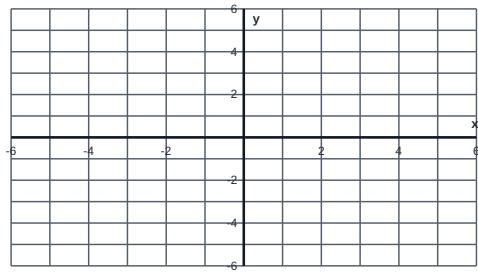

1. Use x first, then y.

U1-MG01-IC02 Use the x- and y-axes correctly.

For Q(5,3), state which axis controls each move. Then plot Q.

First coordinate: _____ axis, move _____

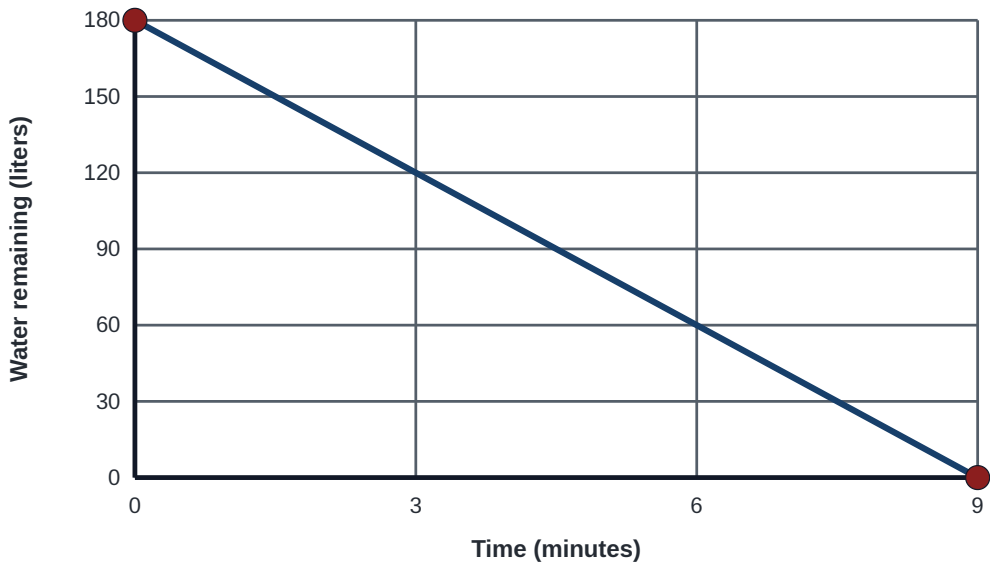

Second coordinate: _____ axis, move _____

2. Interpret intercepts in context.

U1-MG01-IC04 Identify and interpret intercepts when they are shown.

The graph shows water remaining in a tank over time. Interpret both intercepts in context. Include units.

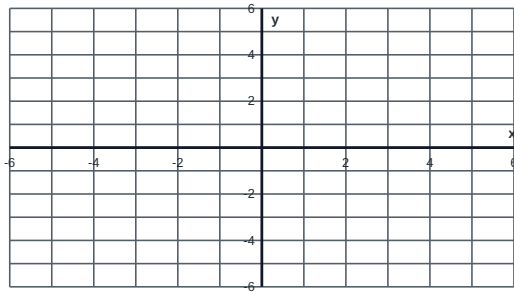

y-intercept: What does it mean? _____

x-intercept: What does it mean? _____

3. Plot a given ordered pair.

U1-MG01-IC01 Plot and read ordered pairs.

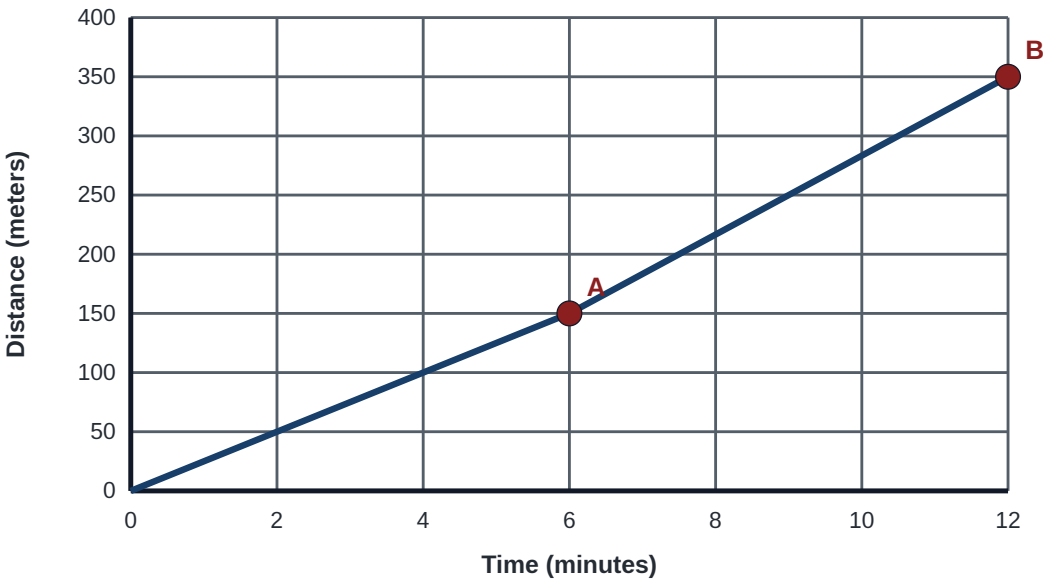

Plot point P(-3,-4) on the coordinate plane and label the point.

4. Read two values and compare.

U1-MG01-IC03 Read a graph using its scale.

Use the graph. How much farther is the distance at t=12 minutes than at t=6 minutes?

At 6 min: _____ m

At 12 min: _____ m

Difference: _____ m

VERSION D

Show enough work to make your thinking clear.

1. Interpret intercepts in context.

U1-MG01-IC04 Identify and interpret intercepts when they are shown.

The graph shows water remaining in a tank over time. Interpret both intercepts in context. Include units.

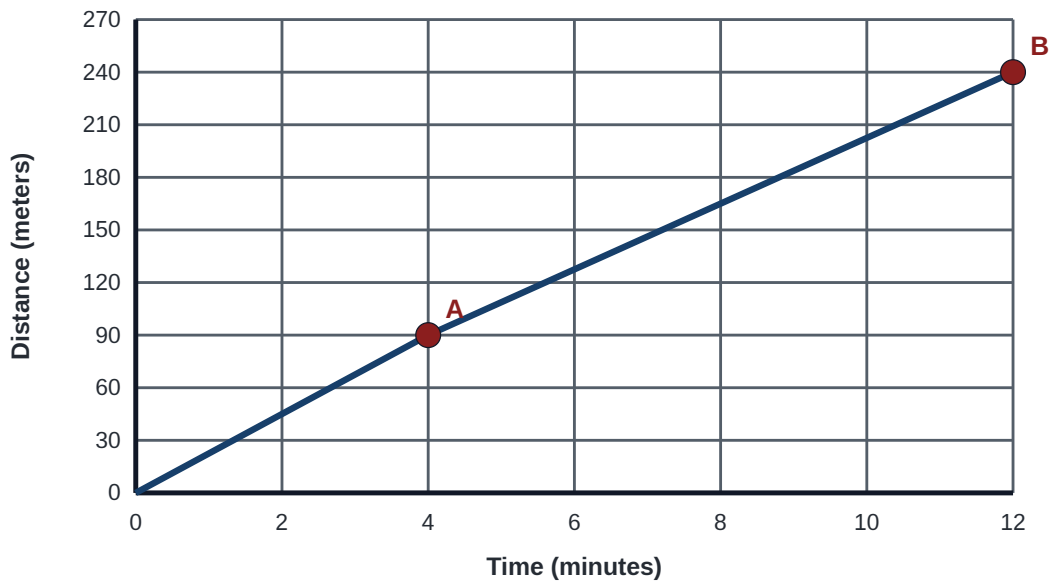

y-intercept: What does it mean? _____

x-intercept: What does it mean? _____

2. Read two values and compare.

U1-MG01-IC03 Read a graph using its scale.

Use the graph. How much farther is the distance at $t=12$ minutes than at $t=4$ minutes?

At 4 min: _____ m

At 12 min: _____ m

Difference: _____ m

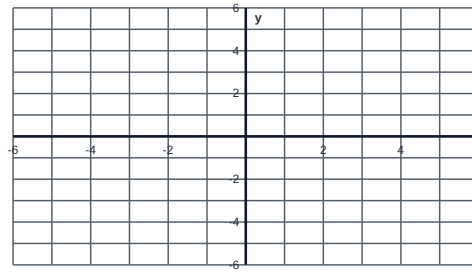

3. Use x first, then y.

U1-MG01-IC02 Use the x- and y-axes correctly.

For $Q(-2, -4)$, state which axis controls each move. Then plot Q .

First coordinate: _____ axis, move _____

Second coordinate: _____ axis, move _____

4. Plot a given ordered pair.

U1-MG01-IC01 Plot and read ordered pairs.

Plot point $P(5, 2)$ on the coordinate plane and label the point.
