## I CAN USE INPUT-OUTPUT RULES TO REPRESENT RELATIONSHIPS.

**1.** I can use input-output rules to represent relationships.

If $y = 2x - 1$, list outputs for $x = 0, 1, 2$. Then solve $2n + 3 = 11$.

**2.** I can use input-output rules to represent relationships.

**Complete the table.**

| x | -2 | 0 | 4 |
|---|---|---|---|
| $y = 3x - 1$ | ? | ? | ? |

**3.** I can use input-output rules to represent relationships.

A function machine triples the input and subtracts 2. What output comes from input 5?

**4.** I can use input-output rules to represent relationships.

| Input | -1 | 0 | 2 |
|---|---|---|---|
| Output | 1 | 3 | 7 |

Describe an operation rule that works for every pair.

**I CAN DISTINGUISH FUNCTIONS FROM RELATIONSHIPS THAT ARE NOT FUNCTIONS.**

**5.** I can distinguish functions from relationships that are not functions.

Pairs $(1, 5), (2, 5), (3, 5)$ all have output 5. Is this a function? Explain.

**6.** I can distinguish functions from relationships that are not functions.

Does $\{(1, 2), (1, 3), (2, 4)\}$ represent a function? Explain.

**7.** I can distinguish functions from relationships that are not functions.

The pairs are $(1, 4), (2, 6), (1, 7)$. Is this relation a function? Explain.

**8.** I can distinguish functions from relationships that are not functions.

**Identify the repeated input.**

| x | -1 | 2 | -1 |
|---|---|---|---|
| y | 3 | 5 | 8 |

## I CAN COMPARE VERTICAL AND HORIZONTAL CHANGES TO FIND SLOPE.

**9.** I can compare vertical and horizontal changes to find slope.

Find $\Delta y$ and $\Delta x$ from $(1, 3)$ to $(4, 9)$.

**10.** I can compare vertical and horizontal changes to find slope.

**Find the slope.**

Rise $-6$, run $3$

**11.** I can compare vertical and horizontal changes to find slope.

Find rise/run from $(-2,1)$ to $(2,-3)$. Then find $y$ when $x = 4$ in $y = 2x + 1$.

**12.** I can compare vertical and horizontal changes to find slope.

**Calculate the slope.**

$(0,-5)$ to $(4,3)$

## I CAN WRITE AND INTERPRET LINEAR EQUATIONS IN SLOPE-INTERCEPT FORM.

**13.** I can write and interpret linear equations in slope-intercept form.

Write an equation of a line with slope $-2$ and y-intercept $5$.

**14.** I can write and interpret linear equations in slope-intercept form.

For $y = 3x - 4$, find the y-intercept.

**15.** I can write and interpret linear equations in slope-intercept form.

**Find the slope.**

$y = -\frac{1}{2}x + 6$

**16.** I can write and interpret linear equations in slope-intercept form.

**Find the y-intercept.**

$y = 5x - 7$

## I CAN INTERPRET SLOPE IN A MOTION SITUATION.

**17.** I can interpret slope in a motion situation.

**Calculate the average speed.**

24 miles in 3 hours

**18.** I can interpret slope in a motion situation.

**Find the distance.**

Speed 5 m/s for 7 s

**19.** I can interpret slope in a motion situation.

Distance increases from 2 meters to 14 meters in 3 seconds. Find the average rate.

**20.** I can interpret slope in a motion situation.

**Find the slope.**

(0,12),(4,28)
