I CAN CONNECT LINEAR GROWTH IN TABLES, GRAPHS, AND EQUATIONS.

1. I can connect linear growth in tables, graphs, and equations.

Find the slope.

Points (1,3) and (5,11)

2. I can connect linear growth in tables, graphs, and equations.

Write an equation.

Slope 4; y-intercept −2.

3. I can connect linear growth in tables, graphs, and equations.

x	0	1	2	3
A	1	4	7	10
B	1	4	9	16

Which is linear? Give numerical evidence.

4. I can connect linear growth in tables, graphs, and equations.

Find the change per step for outputs 5, 9, 13, 17. Is $(1, 2), (2, 2), (1, 3)$ a function?

I CAN WRITE AND INTERPRET LINEAR EQUATIONS IN SLOPE-INTERCEPT FORM.

5. I can write and interpret linear equations in slope-intercept form.

Write an equation of a line with slope -2 and y-intercept 5.

6. I can write and interpret linear equations in slope-intercept form.

For $y = 3x - 4$, find the y-intercept.

7. I can write and interpret linear equations in slope-intercept form.

Find the y-intercept.

$y = 5x - 7$

8. I can write and interpret linear equations in slope-intercept form.

Write an equation with slope 2 and intercept −5. Decide if $(0, 1), (1, 4), (0, 2)$ is a function.

I CAN USE INPUT-OUTPUT RULES TO REPRESENT RELATIONSHIPS.

9. I can use input-output rules to represent relationships.

A machine adds 4 and then doubles the result. The output is 18. Find the input.

10. I can use input-output rules to represent relationships.

If $y = 2x - 1$, list outputs for $x = 0, 1, 2$. Then solve $2n + 3 = 11$.

11. I can use input-output rules to represent relationships.

Input	-1	0	2
Output	1	3	7

Describe an operation rule that works for every pair.

12. I can use input-output rules to represent relationships.

A function machine triples the input and subtracts 2. What output comes from input 5?
