

Quick Check 1.2

Version A

Algebra 1 - Inputs, Outputs, and Functions

Show enough work to make your thinking clear. Write each answer in the space provided.

1. Substitute and evaluate.

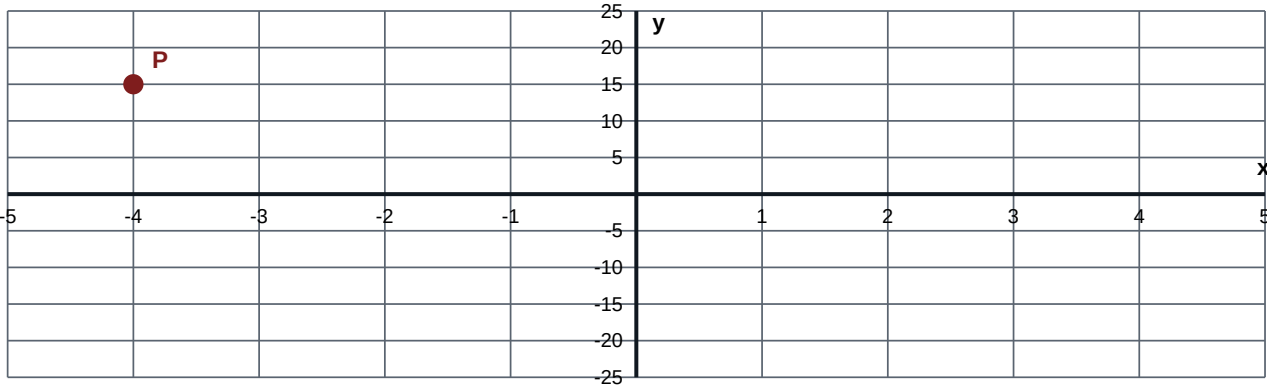

U1-MG03-IC01 - Substitute a value for a variable.

Find the value of $3x + 8$ for $x = -4$.

2. Read the marked coordinate.

U1-MG01-IC03 - Read a graph using its scale.

The x-axis is marked by 1s and the y-axis is marked by 5s. Write the coordinates of point P.

P = (_____ , _____)

3. Evaluate the grouped fraction.

U1-MG03-IC02 - Use order of operations correctly.

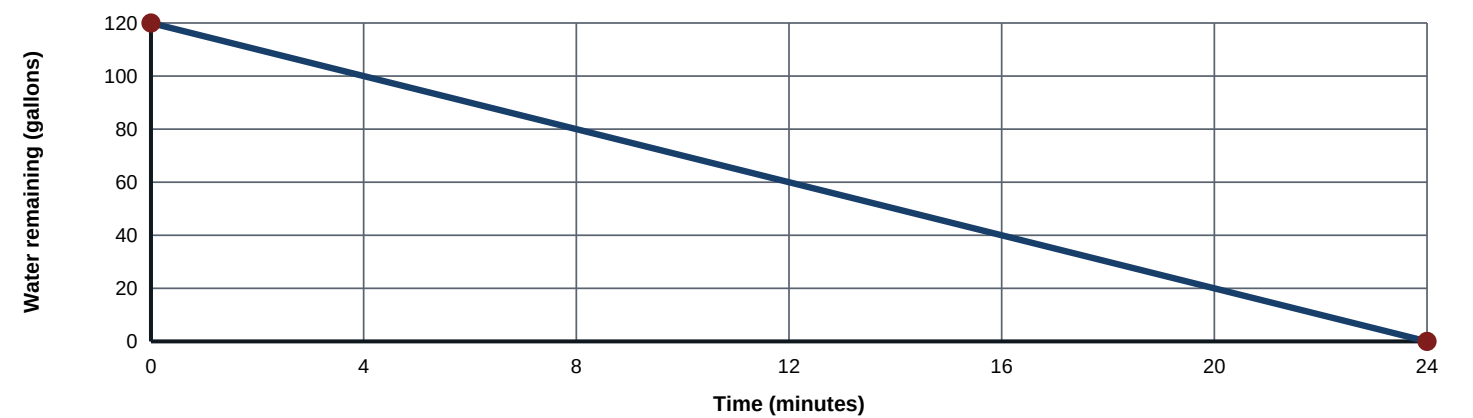

Evaluate: $\frac{2(9-1)+8}{2+4}$

Show the numerator and denominator values before dividing.

4. Interpret the intercepts.

U1-MG01-IC04 - Identify and interpret intercepts when they are shown.

A storage tank is draining. The graph shows how much water remains as time passes. Explain what each intercept means in this situation. Include units.

y-intercept: What does it tell you about the tank?

x-intercept: What does it tell you about the tank?

Quick Check 1.2

Version B

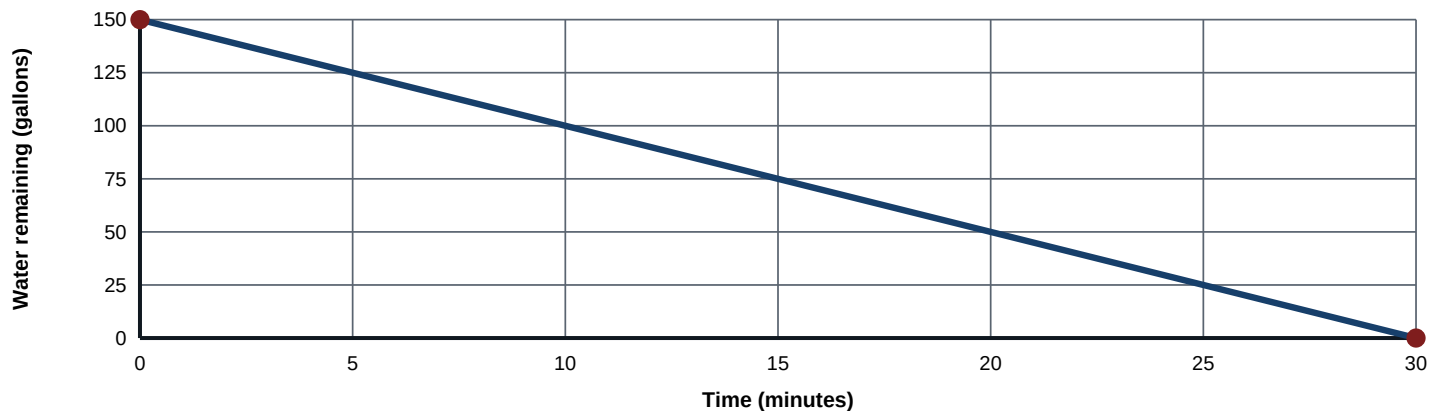

Algebra 1 - Inputs, Outputs, and Functions

Show enough work to make your thinking clear. Write each answer in the space provided.

1. Interpret the intercepts.

U1-MG01-IC04 - Identify and interpret intercepts when they are shown.

A storage tank is draining. The graph shows how much water remains as time passes. Explain what each intercept means in this situation. Include units.

y-intercept: What does it tell you about the tank?

x-intercept: What does it tell you about the tank?

2. Substitute and evaluate.

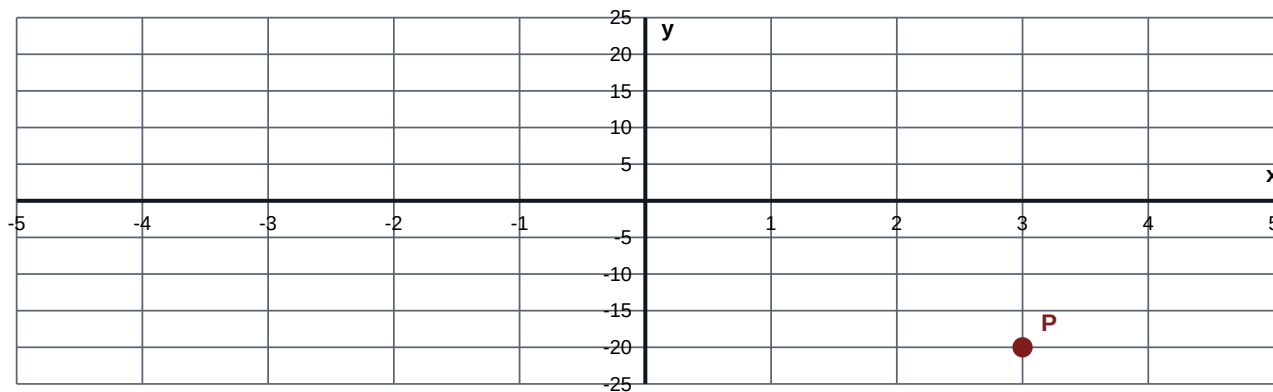

U1-MG03-IC01 - Substitute a value for a variable.

Find the value of $5x - 6$ for $x = -3$.

3. Read the marked coordinate.

U1-MG01-IC03 - Read a graph using its scale.

The x-axis is marked by 1s and the y-axis is marked by 5s. Write the coordinates of point P.

P = (_____ , _____)

4. Evaluate the grouped fraction.

U1-MG03-IC02 - Use order of operations correctly.

Evaluate:
$$\frac{4(8-1)+7}{3+4}$$

Show the numerator and denominator values before dividing.

Name: _____

Date: _____

Quick Check 1.2

Version C

Algebra 1 - Inputs, Outputs, and Functions

Show enough work to make your thinking clear. Write each answer in the space provided.

1. Evaluate the grouped fraction.

U1-MG03-IC02 - Use order of operations correctly.

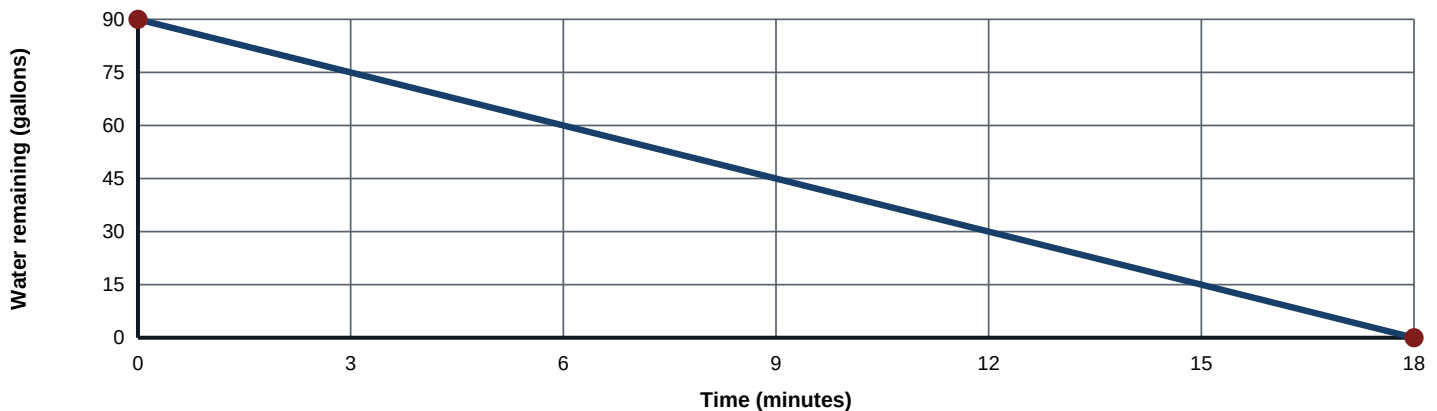

Evaluate:
$$\frac{3(7-1)+6}{5+3}$$

Show the numerator and denominator values before dividing.

2. Interpret the intercepts.

U1-MG01-IC04 - Identify and interpret intercepts when they are shown.

A storage tank is draining. The graph shows how much water remains as time passes. Explain what each intercept means in this situation. Include units.

y-intercept: What does it tell you about the tank?

x-intercept: What does it tell you about the tank?

3. **Substitute and evaluate.**

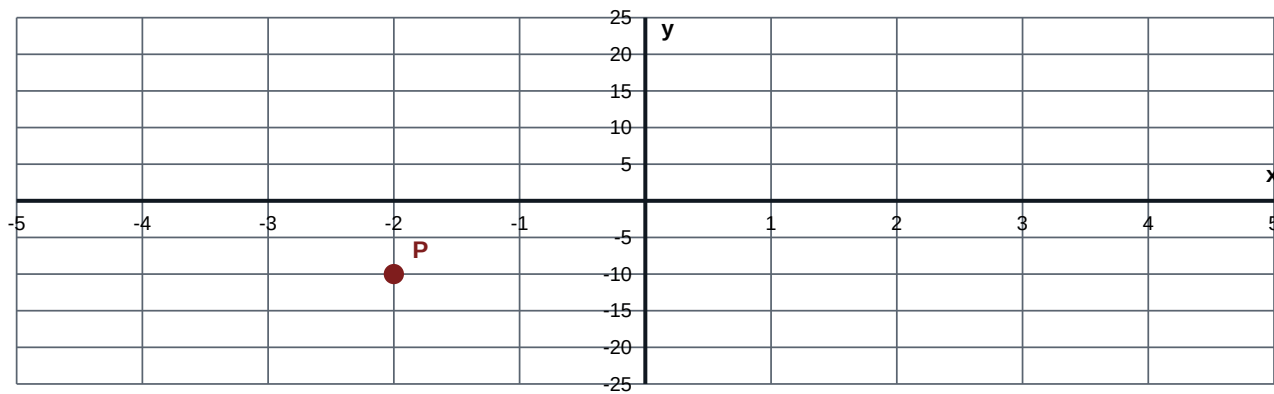

U1-MG03-IC01 - Substitute a value for a variable.

Find the value of $-2x + 7$ for $x = 5$.

4. **Read the marked coordinate.**

U1-MG01-IC03 - Read a graph using its scale.

The x-axis is marked by 1s and the y-axis is marked by 5s. Write the coordinates of point P.

P = (_____ , _____)

Quick Check 1.2

Version D

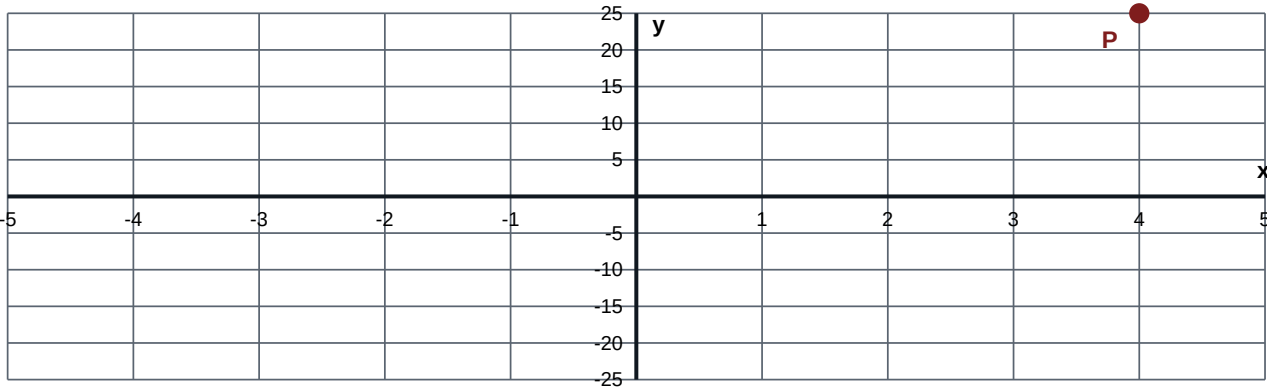

Algebra 1 - Inputs, Outputs, and Functions

Show enough work to make your thinking clear. Write each answer in the space provided.

1. Read the marked coordinate.

U1-MG01-IC03 - Read a graph using its scale.

The x-axis is marked by 1s and the y-axis is marked by 5s. Write the coordinates of point P.

P = (_____ , _____)

2. Evaluate the grouped fraction.

U1-MG03-IC02 - Use order of operations correctly.

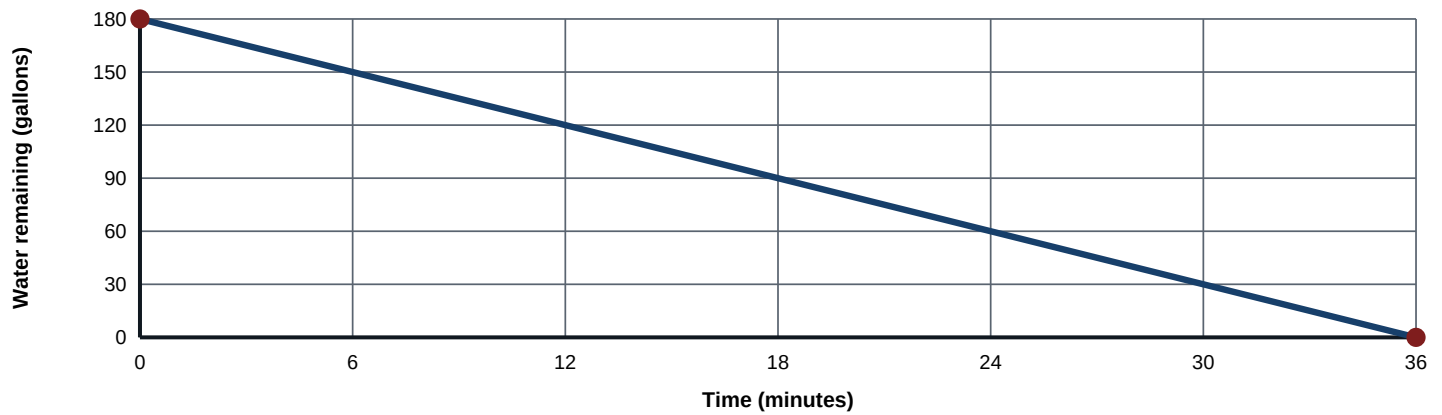

Evaluate:
$$\frac{5(9-2)+7}{2+5}$$

Show the numerator and denominator values before dividing.

3. Interpret the intercepts.

U1-MG01-IC04 - Identify and interpret intercepts when they are shown.

A storage tank is draining. The graph shows how much water remains as time passes. Explain what each intercept means in this situation. Include units.

y-intercept: What does it tell you about the tank?

x-intercept: What does it tell you about the tank?

4. Substitute and evaluate.

U1-MG03-IC01 - Substitute a value for a variable.

Find the value of $4x + 1$ for $x = -6$.
