I CAN DISTINGUISH FUNCTIONS FROM RELATIONSHIPS THAT ARE NOT FUNCTIONS.

1. I can distinguish functions from relationships that are not functions.

Pairs $(1, 5), (2, 5), (3, 5)$ all have output 5. Is this a function? Explain.

2. I can distinguish functions from relationships that are not functions.

Function or not?

$(0, 1), (2, 3), (0, 4)$

3. I can distinguish functions from relationships that are not functions.

Identify the repeated input.

x	-1	2	-1
y	3	5	8

4. I can distinguish functions from relationships that are not functions.

For $y = 2x - 5$, find the output when $x = -1$.

I CAN COMPARE VERTICAL AND HORIZONTAL CHANGES TO FIND SLOPE.

5. I can compare vertical and horizontal changes to find slope.

Find the slope between $(-2, 5)$ and $(2, -3)$.

6. I can compare vertical and horizontal changes to find slope.

Calculate the slope.

$(0,-5)$ to $(4,3)$

7. I can compare vertical and horizontal changes to find slope.

Find the slope.

Rise −6, run 3

8. I can compare vertical and horizontal changes to find slope.

Find rise/run from (−2,1) to (2,−3). Then find y when $x = 4$ in $y = 2x + 1$.

I CAN WRITE AND INTERPRET LINEAR EQUATIONS IN SLOPE-INTERCEPT FORM.

9. I can write and interpret linear equations in slope-intercept form.

Write an equation.

Slope -3, intercept 4.

10. I can write and interpret linear equations in slope-intercept form.

Does $y = 3x + 2$ pass through (2,8) and (4,15)? Explain.

11. I can write and interpret linear equations in slope-intercept form.

Find the slope.

$y = -\frac{1}{2}x + 6$

12. I can write and interpret linear equations in slope-intercept form.

Write an equation with slope 2 and intercept −5. Decide if $(0, 1), (1, 4), (0, 2)$ is a function.
